Chao-Yen Kuo

Battery Pack Characteristic Engineer

台灣

簡介

I am an engineer in Gogoro's Battery Pack Characteristic Team, responsible for failure analysis of battery packs with RMA issues using big data and statistical methods. While my background is in lithium-ion batteries, I am deeply passionate about data science and AI applications, and have self-taught Statistics, Machine Learning, Deep Learning, and LLM Engineering. This reflects my commitment as a continuous and motivated learner. I am eager to apply my analytical skills and AI knowledge to create data-driven solutions as a data analyst, data scientist, or AI engineer, where I can leverage my analytical skills and engineering experience to drive impactful solutions.

If you're interested to know more about me, please interact with my chatbot backed up by LLM:

經歷

Gogoro

Engineer

2019 年 11 月 - Present (6 年 3 個月)

Guishan District, Taoyuan City, Taiwan

Responsible for failure analysis and reliability evaluation of battery packs with RMA issues:

- Conducted failure analysis of battery packs using big data visualization, identifying patterns and trends to deliver solutions
- Built statistical reliability models to evaluate pack failure risk and optimize service lifetime.
- Implemented statistical process control (SPC) methods to monitor issue frequency and maintain quality standards.
- Collaborated with cross-functional teams to develop a data-driven RMA monitoring platform with features for early detection, event tracking, countermeasure analysis, and predictive insights.

- Design rework processes with related members and analyze rework issues using statistical methods.

Aleees

Assistant Engineer

2018 年 4 月 - 2019 年 9 月 (1 年 6 個月)

Taoyuan District, Taoyuan City, Taiwan

- Participated in synthesis of precursors and surface modifications of cathode materials of lithium ion batteries
- Improve experimental methods and formula via feedback of material characterization and electrochemical testing results

EXA ENERGY TECHNOLOGY CO., LTD.

Research And Development Engineer

2017 年 10 月 - 2018 年 3 月 (6 個月)

Xitun District, Taichung City, Taiwan

- Joined the whole manufacturing process of pouch cells
- Made lithium-ion battery samples and perform electrochemical test

Institute of Nuclear Energy Research

Assistant Researcher

2014 年 11 月 - 2017 年 9 月 (2 年 11 個月)

Longtan District, Taoyuan City, Taiwan

Completed my Research and Development Substitute Services and joined two projects.

(Project A) Vanadium Redox Battery

Application: Energy Storage System

Task: Modification of carbon felt as electrode

Highlight: TW Patent(I616022): METHODS OF ENHANCING EFFICIENCY OF CARBON FELT OF FLOW CELL THROUGH SONICATION

(Project B) All solid state thin film lithium ion battery

Application: Internet of Things

Task: Development of all solid state polymer gel electrolyte membrane

Highlight(1): TW Patent(I620370): LITHIUM BATTERY, SOLID ELECTROLYTE MEMBRANE AND THEIR MANUFACTURING METHODS THEREOF

Highlight(2): TW Patent(I667829): ALL-SOLID-STATE BATTERY,
HYBRID STRUCTURE SOLID ELECTROLYTE MEMBRANE AND THEIR
MANUFACTURING METHODS THEREOF

學歷

National Taiwan University of Science and Technology

Master of Science - MS, Chemical Engineering · (2012 年 9 月 - 2014 年 6 月)

National Chung Hsing University

Bachelor's degree, Chemical Engineering · (2008 年 9 月 - 2012 年 6 月)
